1. **You knew you were headed for a career in Computer Science when...**
   I saw a computer play tic-tac-toe at Bell Laboratories in Murray Hill, New Jersey when I was a kid (my dad worked there for a while).

2. **What is your favorite class to teach and why?**
   Computer Graphics 2 and Computer Animation: Algorithms and Techniques because I love to see what the students come up with for their final projects.

3. **One piece of advice I have for students is...**
   Have fun with your classes...the more fun you have, the more stuff you’ll learn...usually without realizing it.

4. **If you could have dinner with a famous computer scientist, living or dead, who would you choose?**
   Probably Alan Turing, but I’d like to dine with him today just to hear what he thinks about the current state of computing.

5. **What is the most interesting project you’ve worked on?**
   Virtual Theatre, as it is a nice combination of four of my passions: theatre, music, computer graphics, and computer science.
