

## **Department of Computer Science**

### **Policy on Student Academic Integrity**

As an institution of higher learning, RIT expects students to behave honestly and ethically at all times, especially when submitting work for evaluation in conjunction with any course or degree requirement (including projects, theses, and independent studies). The Department of Computer Science expects all students to become familiar with the [RIT Honor Code](#) (a general statement that sets high standards of behavior for all members of the RIT community), and with the [RIT Student Academic Integrity Process](#).

RIT's policies provide definitions for academic dishonesty, including cheating, duplicate submission, and plagiarism. Students whose behavior is deemed unethical by an instructor in the Department of Computer Science will be subject to disciplinary action as described in the [RIT Student Academic Integrity Process](#).
