Rubric for Principles of Computing
Team Presentations

This rubric represents the general ideas I expect to see in your presentation. Not all criteria may apply due to the nature of your topic.

**Presenters**

Each team member was introduced.

The team provided an introduction to the talk; overview of the presentation.

Presenters spoke clearly and slowly, and used professional language.

Presenters did not read from slides or other visuals.

The talk was appropriately paced.

**Visuals**

Visuals fit with the talk.

Visuals were accurate.

Visuals were well designed (fonts, colors, amount of content on each slide).

All content of the slides (visuals, drawings) were appropriately credited.

**Overall Presentation**

Team members were aware of their role (who speaks about which topics).

There was a smooth transition between speakers.

All team members participated.

There was a consistent look and feel to the talk/visuals.

Presenters seemed adequately prepared.

Presenters were easily able to handle questions from the audience.

The length of the presentation was within spec.
Technical Content

You clearly explained which of the 4 general topics you selected.

You “set the stage” so the audience understood your topic background.

Your content was not based solely on opinion.

You explained terminology or acronyms that may have been unfamiliar to your audience.

You addressed the topic at a level appropriate for the other members of the class.
