

Java's Collection Interface/Class Hierarchy

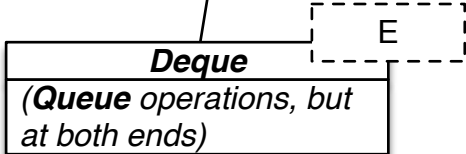

..with selected key methods, but not constructors

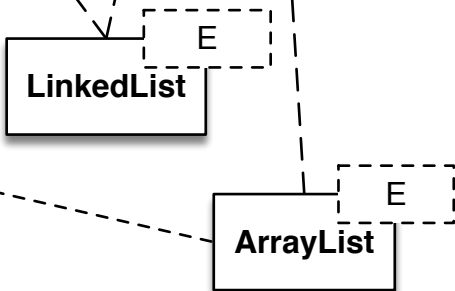

Collection with no duplicates

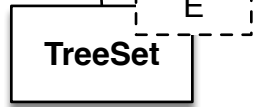

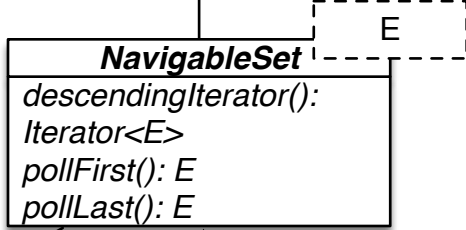

Similar to Python set

Similar to Python list

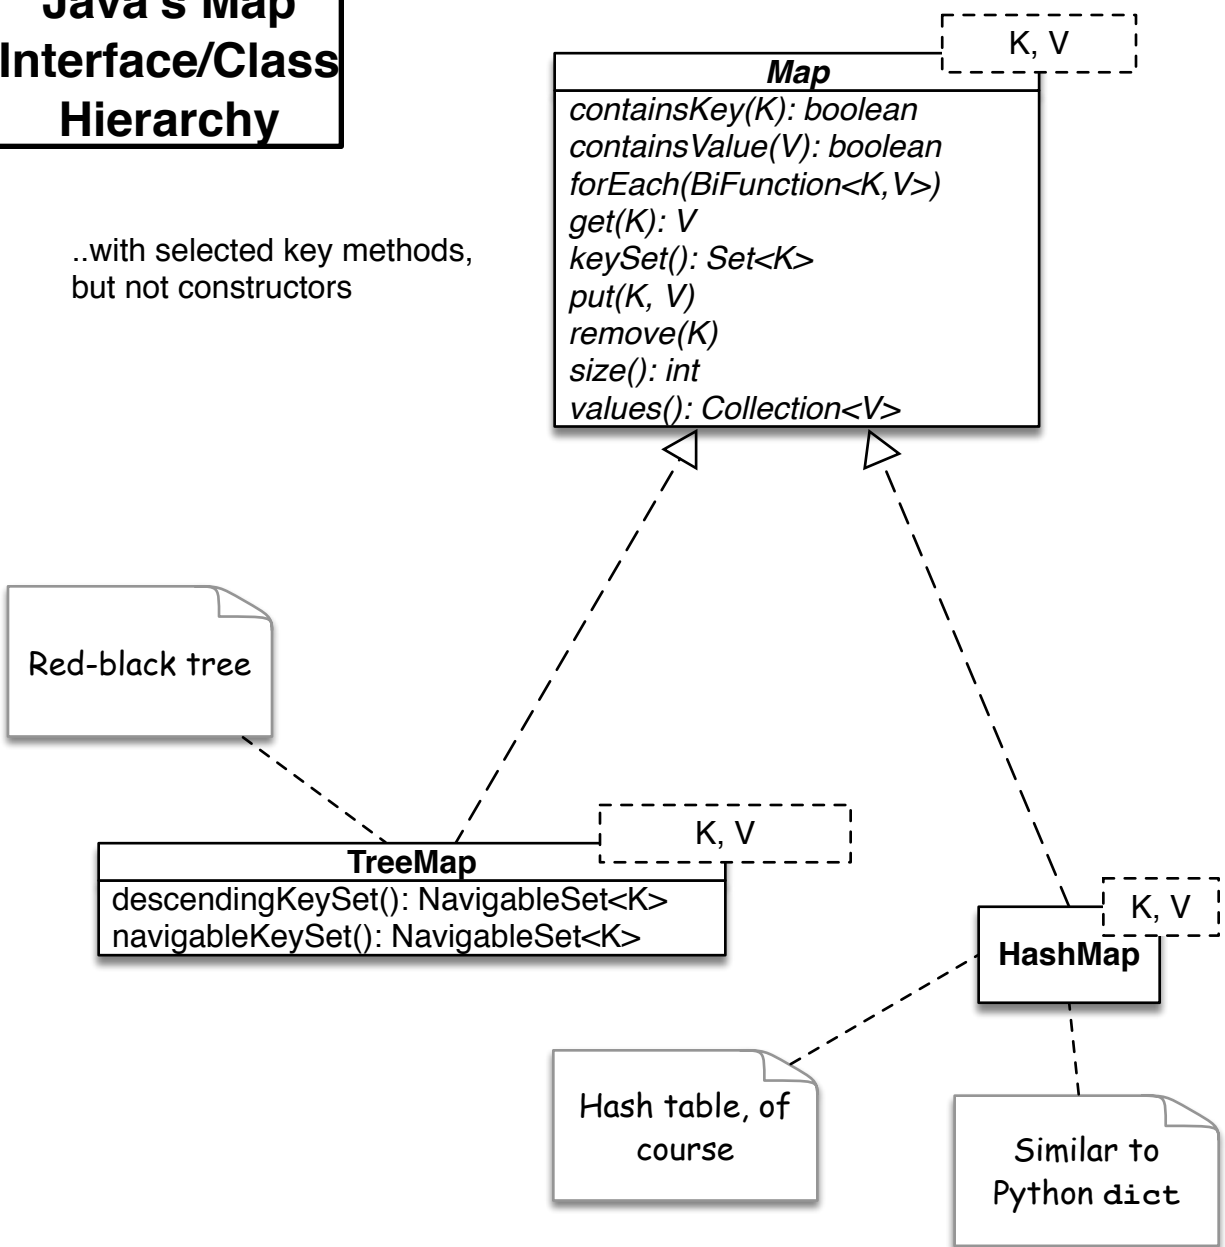

recently added operations for sorted Sets

Java's Map Interface/Class Hierarchy

..with selected key methods, but not constructors

Additional note:

Not shown are classes named **AbstractCollection**, **AbstractList**, **AbstractSet**, **AbstractQueue**, and **AbstractMap**, that incompletely implement their respective interfaces and aid anyone wishing to build their own concrete data structures.
