

The graph illustrates a chemical structure with the following labeled nodes and connections:

- Nodes:** N_1, H_1, C_1, O_1, S_1, N_2, N_3, F_1, and numerous unlabeled nodes representing atoms.
- Edges:** All connections are labeled "Single", indicating single bonds between atoms.
- Structure:** The molecule features a complex, interconnected network of single bonds, including a central ring system and several peripheral chains.
