

The graph illustrates a complex molecular structure with the following components and connections:

- Central Core:** A large ring structure composed of nitrogen (N_1, N_2), oxygen (O_1, O_2, O_3), and sulfur (S_1, S_2, S_3, S_4, S_5, S_6) atoms, connected by single bonds.
- Side Chains and Functional Groups:**
 - Left Side:** A chain starting from N_1, passing through C_1, H_1, and S_1.
 - Top Left:** A chain starting from N_1, passing through C_2, H_2, and S_2.
 - Bottom Left:** A chain starting from C_1, passing through H_3, C_3, H_4, and S_3.
 - Top Right:** A chain starting from O_1, passing through C_4, H_5, and S_4.
 - Bottom Right:** A chain starting from O_3, passing through C_5, H_6, and S_5.
- Internal Connections:** Numerous single bonds connect the atoms within the central ring and between the side chains, forming a highly interconnected network.
