

The diagram illustrates a complex chemical structure, likely a protein or a large organic molecule, showing a network of atoms (O, N, S, C, H) connected by single bonds. The structure is highly branched and includes several functional groups and rings. Key features include a central sulfur atom (S<sub>1</sub>) connected to multiple oxygen (O) and nitrogen (N) atoms, and a large, complex ring system on the right side. The diagram is labeled with atom numbers and chemical symbols, and the connections are labeled "Single".
