

The graph consists of 36 nodes, each labeled with a unique ID. The nodes are interconnected by edges, which are labeled either 'Single' or 'Double'. The graph is highly complex, with many nodes having multiple connections. The nodes are distributed across the image, with some clusters and some isolated nodes. The edges are represented by lines connecting the nodes, with some edges being thicker than others. The labels 'Single' and 'Double' are placed near the edges, indicating the type of connection. The overall structure of the graph is intricate, with many paths and cycles.
