

The diagram illustrates a complex chemical structure, likely a protein or a large organic molecule, represented as a network of atoms connected by single bonds. The atoms are labeled with their chemical symbols and subscripts, indicating their position in the structure. The connections are labeled 'Single', indicating the type of bond between the atoms. The structure is highly branched and includes many labeled atoms such as C<sub>1</sub>, H<sub>1</sub>, O<sub>1</sub>, N<sub>1</sub>, etc. The diagram is a black and white line drawing with labels for each atom and 'Single' for each bond.
