

The graph illustrates a complex molecular structure with the following components:

- Atoms:** A_1, N_1, N_2, S_1, S_2, Z_1, O_1, O_2, O_1_1, and O_2_1.
- Bonds:** Single and Double bonds connecting the atoms.
- Structure:** The graph is highly interconnected, featuring multiple cycles and branches. Key features include:
 - A central chain of atoms connected by single bonds.
 - Branches extending from this central chain, including a side chain with a double bond and a side chain with a double bond and a side chain with a double bond.
 - A complex network of atoms at the bottom, including a side chain with a double bond and a side chain with a double bond.
