

The graph illustrates a complex molecular structure with the following components:

- Central Chain:** A sequence of atoms including S₁, N₁, N₂, N₃, and N₄ connected by single bonds.
- Branching and Substructures:**
 - Atom S₁ is connected to N₁ and S₂.
 - Atom N₁ is connected to S₁, N₂, and S₂.
 - Atom N₂ is connected to N₁, N₃, and S₂.
 - Atom N₃ is connected to N₂, N₄, and O₁.
 - Atom N₄ is connected to N₃, O₂, and O₃.
 - Atom O₂ is connected to N₄ and O₃.
 - Atom O₃ is connected to N₄ and O₂.
- Ring Structure:** A large ring structure on the right side of the graph, involving atoms N₅, O₄, and S₃, connected by single bonds.
