

The diagram illustrates a complex molecular structure, likely a polymer or a large molecule, featuring a chain of various units. The units are connected by bonds, forming a network. The structure includes several clusters of Lanthanum (Ln) atoms, Nitrogen (N) atoms, and Oxygen (O) atoms. The units are connected in a way that suggests a repeating pattern, characteristic of a polymer. The structure is highly branched and includes several rings and open chains. The units are connected by bonds, forming a network. The structure includes several clusters of Lanthanum (Ln) atoms, Nitrogen (N) atoms, and Oxygen (O) atoms. The units are connected in a way that suggests a repeating pattern, characteristic of a polymer. The structure is highly branched and includes several rings and open chains.
