

The chemical structure is a complex organic molecule. It features a central benzene ring. Attached to the benzene ring is a methoxy group (-OCH₃) and a nitro group (-NO₂). The benzene ring is also connected to a side chain that includes a carbonyl group (C=O) and a methoxy group (-OCH₃). The side chain also contains a nitrogen atom bonded to a methyl group (-CH₃) and a carbonyl group (C=O). The side chain is further connected to a carbonyl group (C=O) and a methoxy group (-OCH₃). The side chain is also connected to a carbonyl group (C=O) and a methoxy group (-OCH₃). The side chain is also connected to a carbonyl group (C=O) and a methoxy group (-OCH₃).
