

The chemical structure is a complex molecule featuring a central 1H-imidazole ring. This central ring is substituted at its 2-position with a 4-(4-(4-methyl-1H-imidazol-2-yl)-1H-imidazol-2-yl)-1H-imidazol-2-yl group and at its 4-position with a cyclobutyl group. The 4-methyl-1H-imidazole group is attached to the central imidazole at its 2-position. The cyclobutyl group is attached to the central imidazole at its 4-position. The 4-methyl-1H-imidazole group is attached to the central imidazole at its 2-position. The cyclobutyl group is attached to the central imidazole at its 4-position. The 4-methyl-1H-imidazole group is attached to the central imidazole at its 2-position. The cyclobutyl group is attached to the central imidazole at its 4-position.
