

Chemical structure of 1-(2,2,3,3-tetrafluorobutyl)-4-methylpiperidine-4-carboxylate. The structure shows a piperidine ring with a methyl group and a carboxylate group at the 4-position, and a 2,2,3,3-tetrafluorobutyl group at the 1-position. The carboxylate group is shown as a methyl ester. The piperidine ring is drawn with a nitrogen atom at the top right. The 2,2,3,3-tetrafluorobutyl group is drawn with a central carbon atom bonded to two fluorine atoms (one wedge, one dash) and a CF₂CH₃ group. The methyl ester group is shown as a carbonyl group bonded to a methoxy group.
