

The graph illustrates a complex molecular structure with the following components:

- Atoms:** Carbon (C_1, C_2, C_3, C_4, C_5), Hydrogen (H_1, H_2, H_3, H_4, H_5), Oxygen (O_1, O_2, O_3), and Boron (B_1).
- Bonds:** All bonds are labeled "Single".
- Structure:** The molecule features a central core of interconnected atoms, including a boron atom (B_1) and several oxygen atoms (O_1, O_2, O_3). This core is surrounded by various carbon and hydrogen groups, including a methyl group (C_1, H_1) and a complex ring system involving C_2, C_3, C_4, and C_5.
