

Chemical structure of a complex organic molecule, likely a drug or chemical reagent. The structure features a central benzene ring substituted with a methoxy group (H₃C-O-), a sulfonamide group (-SO₂-N(CH₂)₄-NH-CH₃), and a pyrazole ring. The pyrazole ring is further substituted with a methyl group (CH₃) and a methoxy group (H₃C-O-). The x-axis represents mass-to-charge ratio (m/z) from 0 to 5000.
