

The chemical structure is a complex organic molecule. It features a central benzamide moiety. The amide nitrogen is attached to a benzene ring, which is further substituted with a 4-bromophenyl group and a 1,2,3,4-tetrahydropyridin-2(1H)-one ring. The benzamide carbonyl is attached to a phenyl ring, which is substituted with a 4-(1H-1,2,4-triazol-4-yl) group. The structure is drawn with various bond colors (red, blue, green, orange, purple, brown) and atom labels (N, O, Br) in a stylized font.
