

The chemical structure is 1,1-dichloro-2,2-bis(4-chlorophenyl)ethane. It features a central carbon atom bonded to two chlorine atoms (Cl) and two 4-chlorophenyl groups. The 4-chlorophenyl groups are represented by benzene rings with a chlorine atom at the para position. The structure is drawn with various bond colors (blue, red, green, yellow, cyan) and includes a 3D perspective for the chlorine atoms and the central carbon bonds.
