

Chemical structure of 4-(4-fluorophenyl)-2-fluorophenyl 2-methyl-1-phenyl-1H-imidazole-5-carboxylate. The structure shows a central imidazole ring with a methyl group at position 2, a phenyl group at position 1, and a 4-(4-fluorophenyl)-2-fluorophenyl ester group at position 5. The x-axis represents the molecular weight in Daltons, ranging from 0 to 4000.
